Difficulty: Beginner

Course Duration: 5 Hours

Ruby Fundamentals

About this course:

The Ruby: Fundamentals is a programming language course which provides hands on experience to the candidates on the fundamental components of the Ruby programming language. The course provides a lab intensive, hands-on programming environment, and helps the candidates to explore object-oriented

aspects of Ruby and best practices for developing robust applications with Ruby.

This fundamental course provides a great learning experience for beginner programmers to understand the basics of Ruby programming language. The course enables the students to write a simple code in Ruby and develop the concepts that ultimately help in creating real-world applications using Ruby programming language.

Course Objective:

- Learn the syntax of Ruby programming language
- Understand and implement arrays, hashes and regular expressions
- Learn IO and exceptions
- Understand modules
- Describe Common Gateway Interface (CGI)
- Develop and implement network programming

Audience:

- Individuals experienced with other programming languages such as C++, Java and Perl
- Ruby on Rails developers
- QA engineers

Prerequisite:

- The course requires the students to have sound knowledge of working with Java.
- The students should be able to understand and demonstrate object oriented programming with Java 7 SE and Java 8.

Course Outline:

Chapter 01 - Getting Started

- **Topic A: History and Installation - Part 1**
- History and Installation - Part 2
- History and Installation - Part 3
- **Topic B: Conventions and Best Practices - Part 1**
- Conventions and Best Practices - Part 2
- Conventions and Best Practices - Part 3

Chapter 02 - Classes and Methods

- **Topic A: Classes - Part 1**
- Classes - Part 2
- Classes - Part 3
- **Topic B: Methods - Part 1**
- Methods - Part 2

- Methods - Part 3
- **Topic C: Object Oriented Programming - Part 1**
- Object Oriented Programming - Part 2
- Object Oriented Programming - Part 3

Chapter 03 - Variables and Data Structures

- **Topic A: Variables - Part 1**
- Variables - Part 2
- Variables - Part 3
- **Topic B: Arrays and Structs - Part 1**
- Arrays and Structs - Part 2
- Arrays and Structs - Part 3
- **Topic C: Hashes - Part 1**
- Hashes - Part 2
- Hashes - Part 3

Chapter 04 - Loops and Enumerable Methods

- **Topic A: Loops - Part 1**
- Loops - Part 2
- Loops - Part 3
- **Topic B: Map, Inject, and Permutation - Part 1**
- Map, Inject, and Permutation - Part 2
- Map, Inject, and Permutation - Part 3

Chapter 05 - Finishing Touches

- **Topic A: File Operations - Part 1**
- File Operations - Part 2
- File Operations - Part 3
- **Topic B: Input and Output - Part 1**
- Input and Output - Part 2
- Input and Output - Part 3
- **Topic C: RubyGems - Part 1**
- RubyGems - Part 2
- RubyGems - Part 3

Credly Badge:

Display your Completion Badge And Get The Recognition You Deserve.

Add a completion and readiness badge to your Linkedin profile, Facebook page, or Twitter account to validate your professional and technical expertise. With badges issued and validated by Credly, you can:

- Let anyone verify your completion and achievement by clicking on the badge
- Display your hard work and validate your expertise
- Display each badge's details about specific skills you developed.

Badges are issued by QuickStart and verified through Credly.
