Difficulty: Beginner

Course Duration: 2 Days

Agile Scrum Foundations Certification

About this course:

EXIN Agile Scrum Foundation validates the blended knowledge of professionals in Scrum practices and Agile methodologies. The foundational concept of Agile Scrum is, working together to reach the enterprise goals successfully. Agile methodologies are effective approaches in terms of software development, which has led to them being utilized in other areas of technology. Scrum practices include but are not limited to established self-managed and cross-functional teams; which produces a functional deliverable towards the end of each Sprint or iteration.

Within project-related environments, the high volumes of change and the accompanying uncertainty will always exist at various times. These need to be managed effectively. The course also elaborates on the differences between the Scrum approach and the traditional waterfall project methodologies, as well as a Scrum project's boundaries.

The average salary of an Agile Scrum-certified professional is **$90,000** per year.

Course Objective:

The course eventually leads to Agile Scrum Foundation certification. Delegates get the opportunity to prepare for the certification exam and use our extensive practice question database. The course will let delegates gain a basic understanding of the key parts of Agile Scrum Methodology, which includes:

- Introduction to Agile Scrum
- Scrum planning and practices
- Monitoring Scrum practices
- Advanced Scrum concepts
- Risk specialisms
- Exam preparation

Audience:

Although there is not a necessary requirement, candidates ideally should possess two years at least, of professional Project Management experience. The Agile Scrum Foundation will suit those in the following professional areas:

- Software Development
- Business Management
- IT Service Management
- Project Management

The qualification is meant for anyone working in project management, with responsibilities such as conducting enterprise-wide project-related activities, and leading project teams.

The aforementioned is only a suggestion; as individuals and professionals may attend the courses based on their own career-related aspirations and objectives. Delegates can take as many or as few of the intermediate qualifications as they need.

Prerequisite:

There are no prerequisites for this exam.

Course Outline:
