Practice Exam - N10-008: CompTIA Network+

About this Exam:

The exam is intended to be undertaken by computer support professionals who may be either looking for or occupying entry level positions, having a basic knowledge of computer software, hardware, and operating systems. Additionally, anybody who wants to enhance their understanding and knowledge of networking concepts while gaining the skills needed to excel in network support career or administration career, then this exam is a must for them.

Audience:

This course is intended for entry-level computer support professionals with a basic knowledge of computer hardware, software, and operating systems to prepare for the CompTIA® Network+® (Exam N10-008), or who wish to increase their knowledge and understanding of networking concepts and acquire the required skills to prepare for a career in network support or administration. A typical student taking up the CompTIA® Network+® (Exam N10-008) course should have a minimum of nine months or more of professional computer support experience as a PC or help desk technician. Networking experience is helpful but not mandatory; A+ certification or equivalent skills and knowledge is helpful but not mandatory.

Prerequisite:

- Basic familiarity with networks.
- Understanding of CompTIA A+ Certification topics or to be A+ Certified.

Certifications:

This exam qualifies as the 1 required exam to earn CompTIA Network+ certification.
