Course Duration: 30 Min

Practice Exam - Service Design (SD)

About this Exam:

This exam is intended for individuals who have a greater understanding of the ITIL® Service Design stage of the ITIL® Service Lifecycle and how activities in it may be implemented to enhance the quality of IT service management within an organization.

Audience

- Individuals who require a detailed understanding of the ITIL® service design stage of the ITIL® service lifecycle and how it may be implemented to enhance the quality of IT service provision within an organization.
- IT professionals working within or about to enter a service design environment and requiring an understanding of the concepts, processes, functions and activities involved
- IT experts who are about to enter or have entered an enterprise that specializes in the service design and require a better comprehension of the processes, concepts, activities and functions involved.
- Individuals seeking the ITIL® Expert Certification in IT Service Management for which this qualification can be one of the prerequisite modules
- Individuals seeking progress toward the ITIL® Master Certificate in IT Service Management for which the ITIL® Expert is a prerequisite.

Prerequisites:

- Hold the ITIL® Foundation Certificate in IT Service Management (or equivalent)
- In addition, it is desirable that students have a basic IT literacy and around 2 years IT experience and it is recommended that students complete at least 21 hours of personal study by reviewing the syllabus and the ITIL® Continual service improvement publication in preparation for the examination.

Certifications:

This exam qualifies as the one of the 5 components of Service Lifecycle module to earn ITIL® Intermediate Certification.
