Technology: Cisco

Difficulty: Intermediate

Course Duration: 40 Hours

Implementing Automation for Cisco Security Solutions (SAUI) v1.0 - On Demand

About this course:

The Implementing Automation for Cisco Security Solutions (SAUI) v1.0 course teaches you how to design advanced automated security solutions for your network.

Through a combination of lessons and hands-on labs, you will master the use of modern programming concepts, RESTful application programming interfaces (APIs), data models, protocols, firewalls, web, Domain Name System (DNS), cloud, email security, and Cisco Identity Services Engine (ISE) to strengthen cybersecurity for your web services, network, and devices. You will learn to work within the following platforms: Cisco Firepower® Management Center, Cisco Firepower Threat Defense, Cisco ISE, Cisco pxGrid, Cisco Stealthwatch® Enterprise, Cisco Stealthwatch Cloud, Cisco Umbrella®, Cisco Advanced Malware Protection (AMP), Cisco Threat grid, and Cisco Security Management Appliances. This course will teach you when to use the API for each Cisco security solution to drive network efficiency and reduce complexity.

This course helps you prepare for the Automating and Programming Cisco Security Solutions (300-735 SAUTO) certification exam.

Course Objective:

After taking this course, you should be able to:

- Describe the overall architecture of the Cisco security solutions and how APIs help enable security
- Know how to use Cisco Firepower APIs
- Explain how pxGrid APIs function and their benefits
- Demonstrate what capabilities the Cisco Stealthwatch APIs offer and construct API requests to them for configuration changes and auditing purposes
- Describe the features and benefits of using Cisco Stealthwatch Cloud APIs
- Learn how to use the Cisco Umbrella Investigate API
- Explain the functionality provided by Cisco AMP and its APIs
- Describe how to use Cisco Threat Grid APIs to analyze, search, and dispose of threats

Audience:

This course is designed primarily for professionals in job roles such as:

- Network engineer
- Systems engineer
- Wireless engineer
- Consulting systems engineer
- Technical solutions architect
- Network administrator
- Wireless design engineer
- Network manager
- Sales engineer
- Account manager

Prerequisite:

Before taking this course, you should have the following knowledge and skills:

- Basic programming language concepts
- Basic understanding of virtualization
- Ability to use Linux and CLI tools, such as Secure Shell (SSH) and Bash
- CCNP-level core networking knowledge
- CCNP-level security networking knowledge

The following Cisco courses can help you gain the knowledge you need to prepare for this course:

- Implementing and Administering Cisco Solutions (CCNA)
- Introducing Automation for Cisco Solutions (CSAU)
- Programming Use Cases for Cisco Digital Network Architecture (DNAPUC)
- Introducing Cisco Network Programmability (NPICNP)
- Implementing and Operating Cisco Security Technologies (SCOR)

Course Outline:

Introducing Cisco Security APIs

Role of APIs in Cisco Security Solutions

Cisco Firepower, Cisco ISE, Cisco pxGrid and Cisco Stealthwatch APIs
Use Cases and Security Workflow

Consuming Cisco Advanced Malware Protection APIs

Cisco AMP Overview

Cisco AMP Endpoint API

Cisco AMP Use Cases and Workflows

Using Cisco ISE

Introducing Cisco Identity Services Engine

Cisco ISE Use Cases

Cisco ISE APIs

Using Cisco pxGrid APIs

Cisco pxGrid Overview

WebSockets and STOMP Messaging Protocol

Using Cisco Threat Grid APIs

Cisco Threat Grid Overview

Cisco Threat Grid API

Cisco Threat Grid Use Cases and Workflows

Investigating Cisco Umbrella Security Data Programmatically

Exploring Cisco Umbrella Reporting and Enforcement APIs

Cisco Umbrella Reporting and Enforcement APIs Overview
Cisco Umbrella Reporting and Enforcement APIs: Deep Dive

Automating Security with Cisco Firepower APIs

Review Basic Constructs of Firewall Policy Management
Design Policies for Automation
Cisco FMC APIs in Depth
Cisco FTD Automation with Ansible
Cisco FDM API In Depth

Operationalizing Cisco Stealthwatch and the API Capabilities

Cisco Stealthwatch Overview
Cisco Stealthwatch APIs: Details

Using Cisco Stealthwatch Cloud APIs

Cisco Stealthwatch Cloud Overview
Cisco Stealthwatch Cloud APIs Deep Dive

Describing Cisco Security Management Appliance APIs

Cisco SMA APIs Overview
Csico SMA API

Credly Badge:

Display your Completion Badge And Get The Recognition You Deserve.

Add a completion and readiness badge to your LinkedIn profile, Facebook page, or Twitter account to validate your professional and technical expertise. With badges issued and validated by Credly, you can:

- Let anyone verify your completion and achievement by clicking on the badge
- Display your hard work and validate your expertise
- Display each badge's details about specific skills you developed.

Badges are issued by QuickStart and verified through Credly.
