Difficulty: Intermediate

Course Duration: 40 Hours

Implementing Secure Solutions with Virtual Private Networks (SVPN) v1.0 - On Demand

About this course:

The Implementing Secure Solutions with Virtual Private Networks (SVPN) v1.0 course teaches you how to implement, configure, monitor, and support enterprise VPN solutions.

Through a combination of lessons and hands-on experiences you will acquire the knowledge and skills to deploy and troubleshoot traditional IP Security (IPsec), Dynamic Multipoint Virtual Private Network (DMVPN), FlexVPN, and remote access VPN to create secure and encrypted data, remote accessibility, and increased privacy.

This course helps you prepare for the Implementing Secure Solutions with Virtual Private Networks (300-730 SVPN) exam.

Course Objective:

After taking this course, you should be able to:

- Introduce site-to-site VPN options available on Cisco routers and firewalls
- Introduce remote access VPN options available on Cisco routers and firewalls
- Review site-to-site and remote access VPN design options
- Review troubleshooting processes for various VPN options available on Cisco routers and firewalls

Audience:

This course is designed for professionals in the following job roles:

- Network security engineer
- CCNP Security candidate
- Channel Partner

Prerequisite:

Before taking this course, you should have the following knowledge and skills:

- Familiarity with the various Cisco router and firewall command modes
- Experience navigating and managing Cisco routers and firewalls
- Clear understanding of the benefits of site-to-site and Remote Access VPN options

The following Cisco courses can help you gain the knowledge you need to prepare for this course:

- Implementing and Administering Cisco Solutions (CCNA)
- Implementing and Operating Cisco Security Core Technologies (SCOR)

Course Outline:

- **Introducing VPN Technology Fundamentals**
- **Implementing Site-to-Site VPN Solutions**
- **Implementing Cisco Internetwork Operating System (Cisco IOS) Site-to-Site**

- FlexVPN Solutions
- Implement Cisco IOS Group Encrypted Transport (GET) VPN Solutions
Implementing Cisco AnyConnect VPNs
- Implementing Clientless VPNs

Credly Badge:

Display your Completion Badge And Get The Recognition You Deserve.

Add a completion and readiness badge to your LinkedIn profile, Facebook page, or Twitter account to validate your professional and technical expertise. With badges issued and validated by Credly, you can:

- Let anyone verify your completion and achievement by clicking on the badge
- Display your hard work and validate your expertise
- Display each badge's details about specific skills you developed.

Badges are issued by QuickStart and verified through Credly.
